

## A Channing Home-Grown Green List

Dear Channing Family and Friends,

As we explained in the *Catalyst* "Green Corner," we'd like to know and share what our people are already doing to make their homes and lives and communities more sustainable. Such thoughts might include, energy saving practices, transportation choices, cleaning practices, activism in the community.... You can also include things you're planning or hoping to do in the future. Your name is optional. We'll collate the list without names.

Once we compile the results, we'll share them with the congregation, so we can all be inspired by what our friends are doing, as we make our own plans and commitments. So please list your own strategies (and plans, if you choose) below, and either bring it to a Sunday service or fold, tape, stamp and mail it to Beth, using the pre-addressed mailer form on the back of this page. If you need more space, you can add a page, and if you plan to mail it, staple it on top of this one. **The deadline for returns is September 16.**

Thanks from Your Green Congregation Committee
